

Center for Scientific Computation And Mathematical Modeling

University of Maryland, College Park

Workshop Announcement

Frontiers in Mathematical Biology: Young Investigators Conference 2012

February 29 - March 2, 2012

Keynote Speakers:

Leonid Berlyand, Pennsylvania State University
Suncica Canic, University of Houston
Qing Nie, University of California Irvine
Michael Shelley, The Courant Institute, NY University

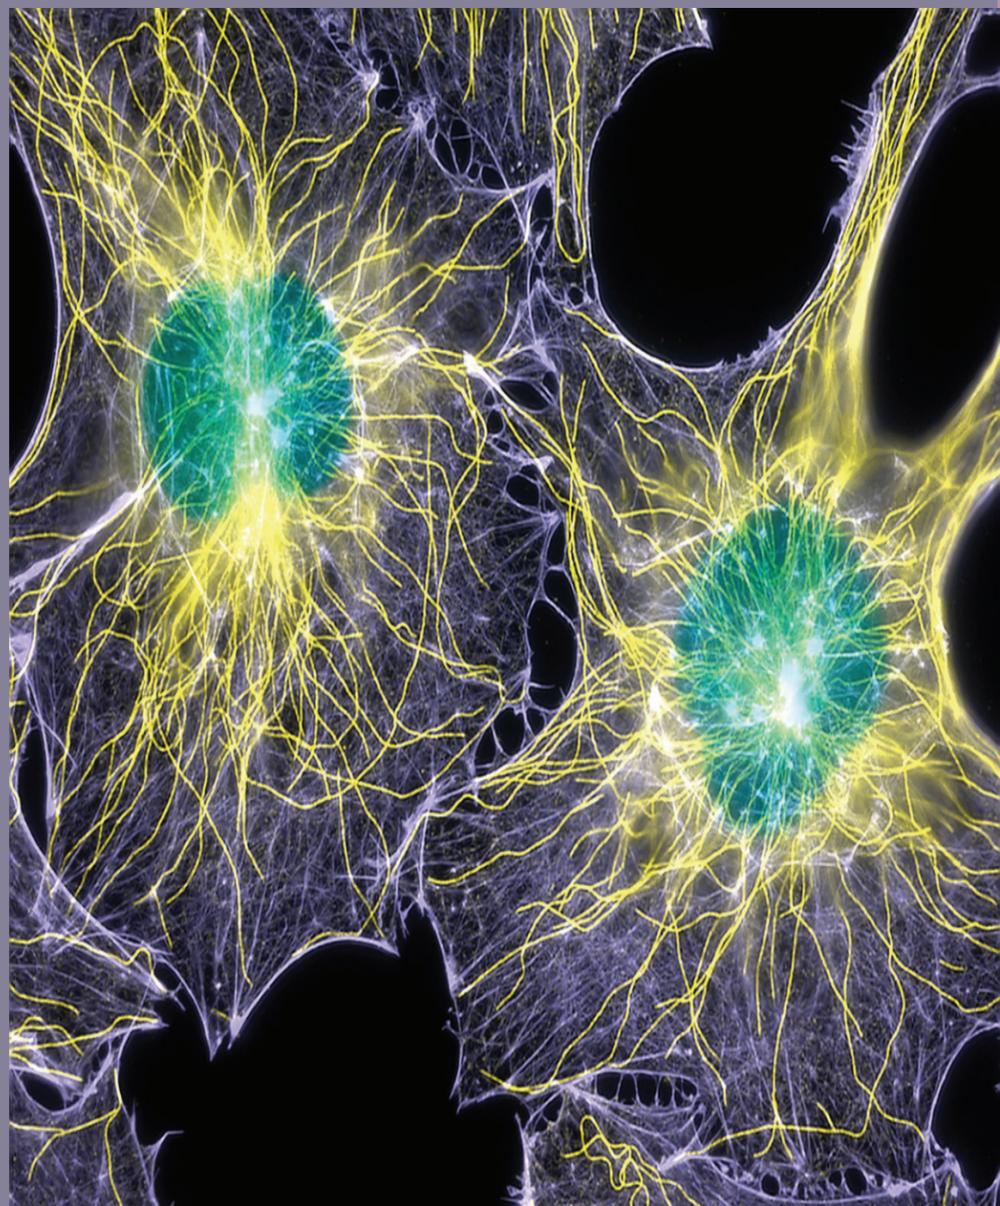

Organizers:

Pierre-Emmanuel Jabin, University of Maryland
Doron Levy, University of Maryland

Objectives:

This workshop is a follow up meeting to the workshop: "Frontiers in Mathematical Biology: NSF-NIH PIs Meeting 2010". This workshop is targeting primarily researchers at an early stage of their career (advanced graduate students, postdocs, and new assistant professors).

- It will focus on recent developments in the area of Mathematical Biology.
- The workshop will provide the attendees with opportunities to present and discuss their research and future challenges.
- It will also provide opportunities to discuss the challenges facing building a research career that crosses the disciplines of mathematics and biology.

Torsten Wittmann, Scripps Research Institute

Partial funding provided by:

National Science Foundation
National Institute of General Medical Sciences

NIGMS
